PROJECTS

Registration and Login Application(React.js, MongoDB, Express.js) :

- Developed a complete full-stack application that can register the user and only registered users are able to login.
- Created the frontend using React, GET and POST routes using Axios, and backend using Express.js.

Hoopla E-Commerce Web Application(React.js, MongoDB, Express.js):

- Developed a dynamic web application which displays the products stored in backend.
- Created the Products Database in MongoDB using mongoose and used the Axios library to get the data dynamically from backend to frontend. Backend is written using Express.js Framework.

Hosting a dynamic web Application (JAVA, MySQL, AWS EC-2, DOCKER)

- Developed a dynamic web application using Java which stores and validates user credentials.
- Hosted this application on Tomcat server and migrated the whole onto an AWS EC-2 instance.
- Migrated the same onto a Docker container using an Alpine image.
